

OUR TEAM

TIBOR VASS

Director
Yumeiho therapist 5th Dan
Representative of Yumeiho

Tibor trained at Yumeiho Center Japan – International Institute of Preventive Medicine. Previous to his training in Yumeiho, Tibor felt from his work as a massage therapist that clients would experience a more comprehensive relief if he had the tools to effectively address joint restriction issues. He realised that his client's muscle and joint problems appeared to coexist. It was difficult to know which was the primary issue, was the muscle leveraging the joint or the joint interfering with the muscle. This lead Tibor on a journey of the worlds body work techniques where he arrived at Yumeiho therapy.

WAYNE SIBSON

Alternate Director
Osteopath

Wayne Sibson is a former state president of the Australian osteopathic association and has published research in osteopathic peer reviewed journals. Wayne has undertaken post graduate training in spinal manipulation, flexion distraction therapy, dorn method and various soft tissue therapies. As a fellow long term back pain sufferer, Wayne is driven to investigate and source the best therapies available to achieve longer lasting pain relief for his patients.

BUSINESS MEANS FREEDOM

What better way to make a living than to help promote health and wellness in our community? We feel privileged to be apart of the natural therapy community where we are afforded the opportunity to help positively impact our clients lives on a daily basis. That side, we operate in a highly competitive marketplace with an ever increasing drop out rate amongst therapists.

We welcome you to consider becoming a yumeiho therapist. Train under Australia's only qualified yumeiho instructor to position yourself with a unique market difference over other musculoskeletal therapists.

Become a 'one stop shop' expert in the treatment of musculoskeletal issues.

Expand your scope of practice to include specific joint based work.

Refer less/attract More. As an expert in your field with greater diversity in your therapy you will be in a position to help your clients further, achieve better longer lasting results, attract greater word of mouth and have less need to refer to other musculoskeletal therapists.

YUMEIHO
IS ONE OF A KIND

www.yumeiho.com.au

SOMETIMES YOU REALLY NEED A BIG CHANGE!

If you are a natural therapist and would like to expand your scope of practice to include joint based work to complement your existing soft tissue skills then join us to become a complete “one stop shop” therapist.

Limit your need to refer your clients out to other therapists by broadening your scope of practice and increase your confidence in dealing with musculoskeletal issues through yumeiho therapy.

ABOUT YUMEIHO THERAPY

Yumeiho therapy originated from Japan and is a synergy of a number of bodywork systems. It is typically conducted on a matted surface on the floor which provides for patient comfort and some mechanical advantage for the practitioner.

Yumeiho is a therapeutic method based on manual actions performed on the entire human body for maintaining or improving health; it includes about 100 maneuvers performed on the entire patient's body.

Yumeiho therapy is an advanced bodywork system that features the integration of soft tissue therapy with gentle joint manipulation. Yumeiho therapy effectively addresses whole body alignment making the yumeiho therapist a “one stop shop” in dealing with musculoskeletal problems.

The human machine is efficient and productive but no machine is perfect without inspection or maintenance.

We treat people as we wish to be treated!
